

Payeer for CMS UMI 15

Open the FTP client server, and transfer the contents of the module folder in the root directory of your site with the replacement of files and folders.

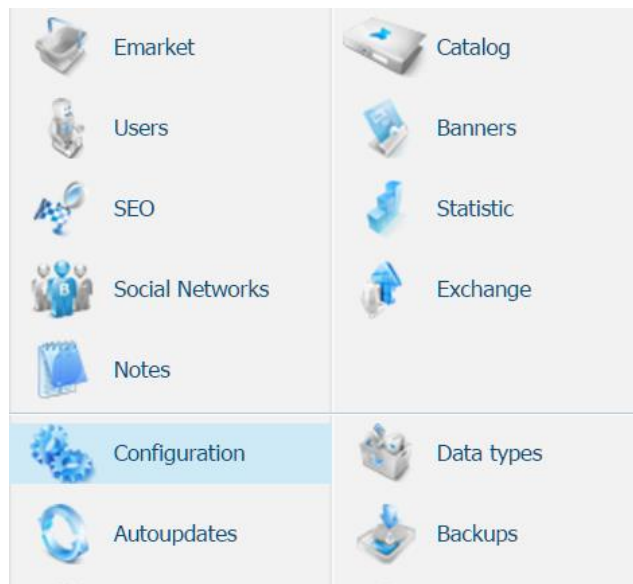

After copying, run the setup module Payeer, writing in the address bar

*** /payeer_install.php

where *** is the domain name of your website (for example, payeer.com/payeer_install.php)

After successful installation of module, delete the file payeer_install.php from the root of the site.

Go to admin panel, go to “Configuration” in the modules, and click the “Caching” tab.

Click “Flush cache”

The screenshot shows the 'Caching' tab in a control panel. The 'General cache' section displays the following settings:

General cache	
Current cache engine	Data base
Cache status	Working
Cache size	582,23 KB
Cache size limit	500 MB
Cache engines	Data base

A red arrow points to the 'Flush cache' button located at the bottom right of the 'Cache engines' row.

In the modules, open the "Emarket"

The screenshot shows the 'Modules' section in a control panel. The 'Emarket' module is highlighted in blue. The modules are organized into two columns:

Modules	UMI,Market	Profile (admin)
Events	Structure	
News	Menu	
Forum	Blogs	
Votes	Comments	
Photoalbums	Webforms	
Dispatches	FAQ	
Emarket	Catalog	
Users	Banners	

Go to the tab "Payments", point to "Add payment method" and select "Payeer"

The screenshot shows the 'Add payment method' dropdown menu. The options are listed in a vertical list:

- PayOnline System
- Курьеру при получении
- Robokassa
- RBK Money
- Счет для юридических лиц
- PayAnyWay
- Деньги Online
- КупиВКредит
- AcquiroPay
- Яндекс.Касса
- PayPal
- Payeer**

A red arrow points to the 'Payeer' option, which is highlighted in blue.

Specify the name of the payment system and payment method Payeer.

Fill in all required fields in the settings of the payment module Payeer

Specify the properties and settings:

URL of the merchant — the default path to the payment <https://payeer.com/merchant/>

ID of the store - ID of your store in the system Payeer.com (can be found in the personal cabinet).

Secret key – the secret key of your store.

You can specify the list of all trusted ip addresses of servers, separated by commas. You can also specify a mask instead of the IP address. If the field is empty, checking for trusted IP addresses is not implemented.

For example:

192.168.71.87, 192.165.83.17, 192.178.34.15
or 192.*.71.87, 192.165.83.*, 192.*.34.15
or *.*.*.* - all available IP addresses.

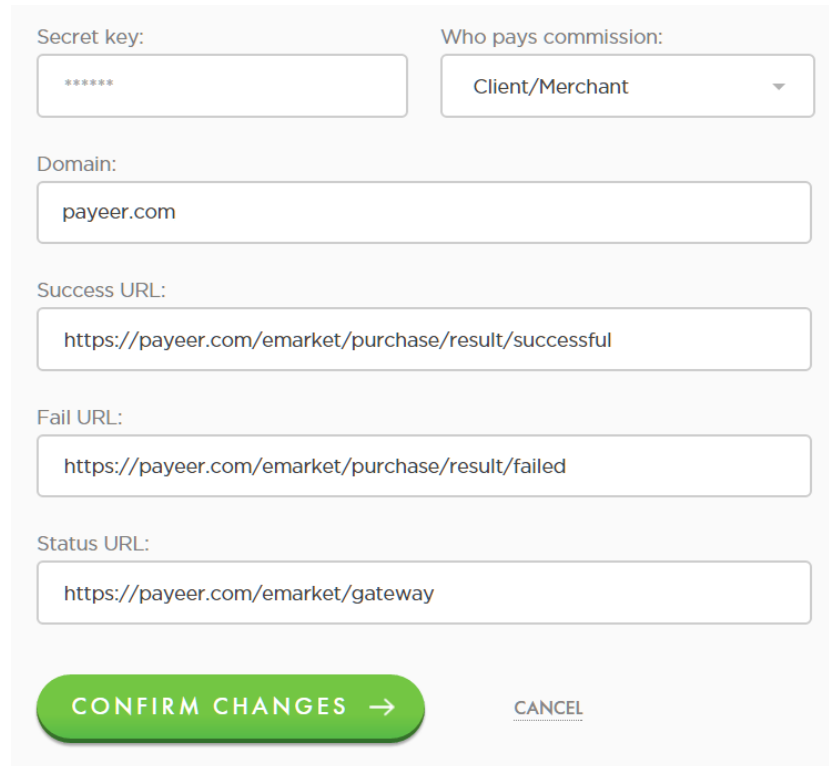

Enter your email address to receive notices in the event of an error of payment. The letter will state the reason and basic information about the payment.

If you specify the path to the file logging, you will be recording information about payments via Payeer.

Click "Add and exit"

Configuring the module in admin panel completed.

Enter the URL address in the “account Payeer → Merchant → Settings”

The screenshot shows a web form for configuring Payeer merchant settings. It includes fields for a secret key (masked with asterisks), a dropdown for 'Who pays commission' (set to 'Client/Merchant'), and text inputs for 'Domain' (payeer.com), 'Success URL' (https://payeer.com/emarket/purchase/result/successful), 'Fail URL' (https://payeer.com/emarket/purchase/result/failed), and 'Status URL' (https://payeer.com/emarket/gateway). At the bottom are two buttons: a green 'CONFIRM CHANGES →' button and a blue 'CANCEL' button.

Secret key:	Who pays commission:
*****	Client/Merchant ▼
Domain:	
payeer.com	
Success URL:	
https://payeer.com/emarket/purchase/result/successful	
Fail URL:	
https://payeer.com/emarket/purchase/result/failed	
Status URL:	
https://payeer.com/emarket/gateway	
CONFIRM CHANGES → CANCEL	

Success URL

http:// *****/emarket/purchase/result/successful

Fail URL

http:// *****/emarket/purchase/result/failed

Status URL

http:// *****/emarket/gateway

Where ***** is your domain

Confirm changes.

Payeer module for CMS UMI 15 configured.
